About the role

We're looking for a Financial Analyst to execute and support the company's financial operations through financial analysis, cash flow management, and reliable financial information that enables efficient operations and sound decision-making — ensuring the company operates with confidence, manages risk, and honors its commitments to partners and lenders.

What you'll be doing

- Perform financial analysis of performance, trends, and risks across operations and trading;
- Prepare budgets, forecasts, and management reports with KPIs;
- Manage cash flow, bank reconciliations, and trade finance processes;
- Support credit analysis and financing structure assessments;
- Process payments, including payroll, ensuring data integrity in integrated systems;
- Contribute to the standardization and automation of financial processes.

What you'll bring

- Hands-on experience with financial analysis, treasury, or trade finance, ideally within trading, commodities, or a multinational environment.
- Advanced English required; Portuguese is a plus.
- Strong sense of ownership, analytical reasoning, and clear communication.

What we offer

- Competitive compensation, based on experience
- Annual company-wide bonus, based on the achievement of financial and qualitative goals
- 20 paid vacation days
- Company-provided laptop
- Direct exposure to a global trading business end to end, in a lean team with real autonomy and close proximity to leadership

Our commitment to inclusion

Ally is committed to fostering an inclusive workplace that celebrates diversity in all its forms. We welcome applications from people of all backgrounds, experiences, and perspectives.
